

STANLEY[®]

YOUR HAMMER SHOULD BE THE ONLY THING POUNDING.

STANLEY[®] PERSONAL PROTECTION HEARING PRODUCTS: Exposure to high noise levels from table saws, lawn mowers and other machinery can damage your hearing. As a rule of thumb, if you are not able to hear someone talking from three feet away, the noise level is hazardous. Stanley's line of hearing safety products includes earmuffs in three different styles: low profile, premium foldable and an AM/FM Radio earmuff. Each Stanley earmuff features the patented Air Flow Control[™] technology, delivering optimal attenuation across all frequencies without increasing earcup size or weight. In addition, Stanley offers a selection of single-use and multiple-use earplugs that feature the latest innovations in comfort, performance and protection.

Personal Protection from a trusted brand.
